

Boat Lifts Craftlander

CRAFTLANDER®

Craftlander boat lifts are constructed of special T-6 6061 aluminum extrusions and load tested from 130% to 200% of its rated capacity. Much of the hoist's construction utilizes bolts rather than welds to make the hoist easy to assemble and transport. The hoist's vertical high lift design keeps the boat far out of the reach of waves.

Craftlander pwc series lifts are constructed of the same material as the vertical series and are available in 4 models; two economical cantilever styles, a double lift and a high lift vertical.

Optional winch units and many other accessories are available to complete your lift.

Optional roof systems are available in a variety of attractive colours.
